NOTES

ABOUT THIS PUBLICATION

This publication presents information about the nature of employment arrangements in the Australian workforce. It also presents information about different types of employment which can be cross-classified by characteristics such as hours worked, industry, occupation, and demographic characteristics.

The statistics in this publication were compiled from data collected in the Forms of Employment Survey, conducted throughout Australia in November 2012 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS). Questions were asked about employment arrangements in the main job of all employed people, except those who were contributing family workers in their main job.

ROUNDING

As estimates have been rounded, discrepancies may occur between sums of the component items and totals.

CONCEPTUAL FRAMEWORK

INTRODUCTION

Australia's workforce is diverse. There is diversity in employment arrangements, flexible working time patterns, and in the extent of part-time and casual employment. The rate of casual employment (those without either paid sick leave and paid holiday leave entitlements) has remained relatively steady over the last 10 years.

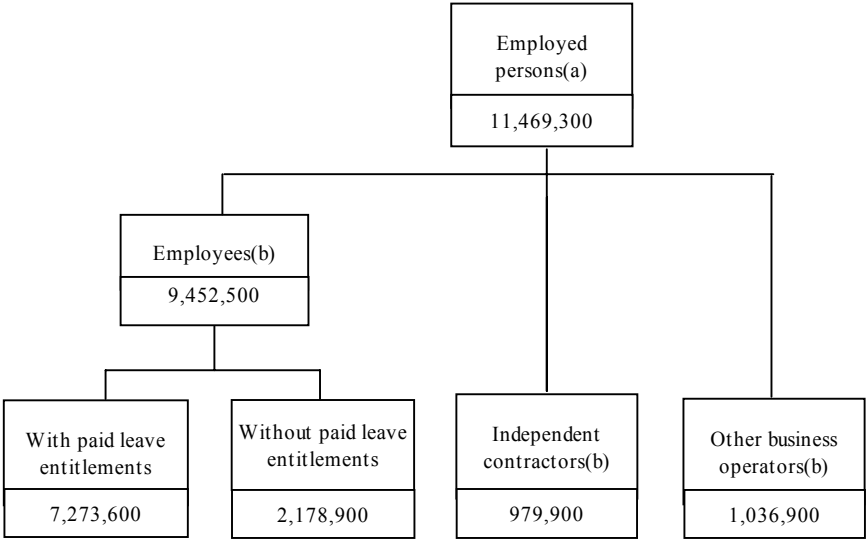

The Forms of Employment Survey (FOES) provides information on some of the key factors relating to the nature of employment arrangements in the Australian labour market. The survey also describes some of the employment and demographic characteristics of people in different forms of employment.

THE FORM OF EMPLOYMENT FRAMEWORK

This conceptual framework classifies jobholders to a 'Form of employment' on the basis of their main job, that is, the job in which they usually worked the most hours. The form of employment category groups are:

- Employees;
- Independent contractors; and
- Other business operators.

Employees are then further classified according to whether they had paid leave entitlements, that is, whether they had paid sick and/or paid holiday leave.

- (a) Excludes persons who were contributing family workers in their main job.
(b) In main job.

Employees in the Forms of Employment survey are defined as people who work for a public or private employer and receive remuneration as wages or salary. Employees are engaged under a contract of service (an employment contract) and take directions from their employer/supervisor/manager/foreman on how the work is performed. This definition of employees is different from that used in the monthly Labour Force Survey and other ABS household surveys (see Glossary and Appendix 1).

Independent contractors are defined as people who operate their own business and who are contracted to perform services for others without having the legal status of an employee, i.e. people who are engaged by a client, rather than an employer to undertake the work. Independent contractors are engaged under a contract for services

.....

CONCEPTUAL FRAMEWORK *continued*

THE FORM OF
EMPLOYMENT
FRAMEWORK *continued*

(a commercial contract), whereas employees are engaged under a contract of service (an employment contract). Independent contractors' employment may take a variety of forms, for example, they may have a direct relationship with a client or they may work through an intermediary. Independent contractors may have employees, however they spend most of their time directly engaged with clients or on client tasks, rather than managing their staff.

Other business operators are defined as people who operate their own business, with or without employees, but who are not operating as independent contractors. Other business operators are distinguished from independent contractors in that they generally generate their income from managing their staff or from selling goods or services to the public, rather than providing a labour service directly to a client. Other business operators spend little time working on client tasks with most of their time spent on managing their employees and/or business.

SUMMARY OF FINDINGS

OVERVIEW

In November 2012, the Forms of Employment Survey (FOES) found there were nearly 11.5 million employed persons aged 15 years and over.¹ Of these, 7.3 million (63%) were employees with paid leave entitlements in their main job, that is, they were entitled to paid sick and/or paid holiday leave. Of the remaining employed persons:

- nearly 2.2 million were employees without paid leave entitlements (19%);
- 980,000 were independent contractors (9%); and
- just over 1.0 million were other business operators (9%) (Table 1).

ALL EMPLOYED PERSONS

Employed men were more likely than women to be independent contractors (12% compared to 5%) or other business operators (10% compared to 8%). As a result, employed women were more likely to be employees (87% compared to 78% for males).

FORM OF EMPLOYMENT, By age group (years)—Males, 2012

FORM OF EMPLOYMENT, By age group (years)—Females, 2012

SUMMARY OF FINDINGS *continued*

ALL EMPLOYED PERSONS

continued

Younger persons were most likely to be employees rather than independent contractors or other business operators. As age increases, generally the proportion of employees decreases, while the proportion of independent contractors and other business operators increase. However, being an employee was the most common form of employment for employed persons for all age ranges. For example:

- 96% of employed persons aged 15–24 years were employees, 3% were independent contractors and 1% were other business operators;
- 79% of employed persons aged 35–54 years were employees, 10% were independent contractors and 11% were other business operators; and
- 59% of employed persons aged 65 years and over were employees, 16% were independent contractors and 25% were other business operators (Table 3).

EMPLOYEES

Of the 9.5 million persons who were employees, 52% were male.

Of the 7.3 million employees with paid leave entitlements, 54% were male (Table 1).

Four out of five (80%) male employees had paid leave entitlements, compared to three out of four female employees (74%) (Table 7).

Industry

EMPLOYEES, MALES, Selected industries of main job, 2012

EMPLOYEES, FEMALES, Selected industries of main job, 2012

SUMMARY OF FINDINGS *continued*

Industry continued

For males, the industry division with the most employees was Manufacturing (13%) followed by Construction (11%). However for females, the industry division with the most employees was Health care and social assistance (22%), followed by Retail trade (14%), and Education and training (13%) (Table 4).

The industry divisions with the highest proportion of males and females with paid leave entitlements were Financial and insurance services, and Mining (93% for both males and females in both industries). The industry division with the lowest proportion of males and females with paid leave entitlements was Accommodation and food services (42% and 32% respectively) (Table 7).

Occupation

Male employees were most likely to be in the occupations Technicians and trade workers (22%), and Professionals (19%). In contrast half of all female employees were concentrated in two occupations – Professionals (26%) and Clerical and administrative workers (24%) (Table 4).

For both male and female employees, the occupation group with the highest proportion of paid leave entitlements was Managers (95% and 91% respectively). This was followed by Professionals for both males and females (92% and 89% respectively).

The occupation group with the lowest proportion of male employees with paid leave entitlements was Labourers (56%). By comparison, for females it was the occupations of Sales workers, and Labourers (both 49%) (Table 7).

Full-time/Part-time Status

An estimated 6.6 million (70%) employees worked full-time in their main job. Most employees who worked full-time in their main job had paid leave entitlements (90%). By comparison, of the 2.8 million part-time employees, less than half (47%) had paid leave entitlements (Table 7).

Other employment characteristics

Other characteristics of employees in November 2012 included:

- 22% had been with their current employer for less than one year, while 21% had been with their current employer for 10 years or more (Table 2);
- 19% were aged 15–24 years, and 15% were aged 55 years and over (Table 3);
- 39% had some say in their start and finish times (Table 5);
- 69% worked weekdays only in their job/s², while a further 30% worked both weekdays and weekends (Table 5); and
- Only 4% worked on a fixed-term contract, of whom 53% were in the occupation of Professionals (Table 6).

INDEPENDENT CONTRACTORS

There were 980,000 persons who were independent contractors in their main job in November 2012. Independent contractors made up 9% of all employed people. The number of independent contractors had declined by 47,000 since November 2011, after a decline of 83,600 between 2010 and 2011 (Table 1).

The decrease was mostly driven by the decline in the number of male contractors between 2010 and 2012, down from 824,400 to 716,500 or 13%. In contrast, over the same period female contractors had declined from 286,100 to 263,400 (8%).

SUMMARY OF FINDINGS *continued*

Hours Worked

Nearly three-quarters (73%) of independent contractors were male. Almost half (47%) of all independent contractors worked 40 hours or more in their main job in the week before they were interviewed (56% of males and 23% of females). While male independent contractors were more likely to have worked 40 hours or more compared to male employees (56% compared to 50%), female independent contractors were not more likely to have worked 40 hours or more than female employees (23% compared to 25%) (Table 2).

Male independent contractors were more likely to have worked longer hours than females. For example, 29% of male independent contractors worked 49 hours or more in their main job in the week before interview, compared with 12% of female independent contractors. This was higher than for employees (18% of men and 6% of women) (Table 2).

Industry

Independent contractors were most prevalent in the Construction industry (29%) followed by the Administrative and support services industry (21%). The industries with the highest proportion of male independent contractors were Construction (31%), followed by Administrative and support services (25%). These industries also had the highest proportion of female independent contractors (17% for both) (Table 4).

Occupation

PROPORTION OF INDEPENDENT CONTRACTORS, MALES, Occupation of main job, 2012

PROPORTION OF INDEPENDENT CONTRACTORS, FEMALES, Occupation of main job, 2012

SUMMARY OF FINDINGS *continued*

Occupation continued

For males, the occupations with the highest proportion of independent contractors were Technicians and trades workers (18%), followed by Labourers (13%) and Professionals (12%). These were also the same occupations for woman, but at lower rates (9%, 8% and 7% respectively) (Table 4).

Other employment characteristics

Three-quarters (76%) of independent contractors were usually able to work on more than one active contract at a time, however only just under half (48%) of all independent contractors had more than one active contract in the week before interview (Table 10).

Other characteristics of independent contractors in November 2012 included:

- 61% had authority over their own work (62% of males and 58% of females) (Table 10);
- 63% were able to (sub)contract their own work (66% of males and 57% of females);
- 80% had no employees (77% of males and 86% of females) (Table 10);
- 14% had been with their current business for less than one year, while 37% had been with their current business for 10 years or more (Table 2);
- 83% had some say in their start or finish times (Table 5); and
- 58% usually only worked weekdays in all of their job/s², while a further 42% usually worked on both weekdays and weekends (Table 5).

OTHER BUSINESS OPERATORS

There were just over 1.0 million other business operators in November 2012 or 9% of employed persons, of whom 61% were male (Table 1).

Industry

Half of those employed in the Agriculture, forestry and fishing industry were other business operators (49% of males and 52% of females) (Table 4).

Occupation

PROPORTION OF OTHER BUSINESS OPERATORS, MALES, Occupation of main job, 2012

SUMMARY OF FINDINGS *continued*

Occupation continued

PROPORTION OF OTHER BUSINESS OPERATORS, FEMALES, Occupation of main job, 2012

The most common occupation of other business operators for both males and females was Managers (43% and 31% respectively) (Table 4). This is in line with the definition of other business operators – that they operate their own business and generally generate their income from managing their staff or selling goods or services to the public.

Over a quarter of all managers were other business operators (29% of males and 25% of females) (Table 4).

Other employment characteristics

Other characteristics of other business operators in November 2012 included:

- 57% actually worked 40 hours or more in their main job in the reference week (71% of males and 34% of females), while almost two-thirds (65%) of these actually worked 49 or more hours in the reference week (Table 2);
- 8% had been in their current business for less than one year, while almost half (49%) had been with their current business for 10 years or more (Table 2);
- 87% had some say in their start or finish times (Table 5); and
- 46% usually only worked weekdays in all of their job/s², while a further 53% worked on both weekdays and weekends (Table 5).

END NOTE

1. Excluding contributing family workers.
2. See paragraph 19 of the Explanatory Notes for more information.

EXPLANATORY NOTES

INTRODUCTION

1 The statistics in this publication were compiled from data collected in the Forms of Employment Survey (FOES), conducted throughout Australia in November 2012 as a supplement to the Australian Bureau of Statistics (ABS) monthly Labour Force Survey (LFS). Respondents to the LFS who fell within the scope of the supplementary survey were asked further questions.

2 Information about survey design, scope, coverage and population benchmarks relevant to the monthly LFS, which also applies to supplementary surveys, can be found in the publication *Labour Force, Australia* (cat. no. 6202.0)

CONCEPTS, SOURCES AND METHODS

3 The conceptual framework used in Australia's LFS aligns closely with the standards and guidelines set out in Resolutions of the International Conference of Labour Statisticians. Descriptions of the underlying concepts and structure of Australia's labour force statistics, and the sources and methods used in compiling these estimates, are presented in *Labour Statistics: Concepts, Sources and Methods* (cat. no. 6102.0.55.001).

SCOPE

4 The scope of the LFS is restricted to persons aged 15 years and over and excludes the following people:

- members of the permanent defence forces;
- certain diplomatic personnel of overseas governments, customarily excluded from the Census and estimated populations;
- overseas residents in Australia; and
- members of non-Australian defence forces (and their dependants).

5 Students at boarding schools, patients in hospitals, residents of homes (e.g. retirement homes, homes for people with disabilities), and inmates of prisons are excluded from all supplementary surveys.

6 This supplementary survey was conducted in both urban and rural areas in all states and territories, but excluded persons living in Aboriginal and Torres Strait Islander communities in very remote parts of Australia.

7 This survey was restricted to employed persons aged 15 years and over who were not contributing family workers in their main job.

COVERAGE

8 The estimates in this publication relate to persons covered by the survey in November 2012. In the LFS, coverage rules are applied which aim to ensure that each person is associated with only one dwelling, and hence has only one chance of selection in the survey. See *Labour Force, Australia* (cat. no. 6202.0) for more details.

SAMPLE SIZE

9 Supplementary surveys are not conducted on the full LFS sample. Since August 1994 the sample for supplementary surveys has been restricted to no more than seven-eighths of the LFS sample.

10 The sample for FOES is a subsample of the 36,803 private dwelling households and special dwelling units included in the monthly LFS in November 2012. The final sample on which estimates are based is composed of 29,655 persons aged 15 years and over who, in November 2012, were:

- employed:
 - employees;
 - independent contractors;
 - other business operators.

RELIABILITY OF THE ESTIMATES

11 Estimates in this publication are subject to sampling and non-sampling errors:

- Sampling error is the difference between the published estimate and the value that would have been produced if all dwellings had been included in the survey. For more information, see the Technical Note.

EXPLANATORY NOTES *continued*

RELIABILITY OF THE ESTIMATES *continued*

- Non-sampling errors are inaccuracies that occur because of imperfections in reporting by respondents and interviewers and errors made in coding and processing data. These inaccuracies may occur in any enumeration, whether it be a full count or a sample. Every effort is made to reduce the non-sampling error to a minimum by careful design of questionnaires, intensive training and supervision of interviewers and effective processing procedures.

SEASONAL FACTORS

- 12** The estimates are based on information collected in the survey month (November) and, due to seasonal factors, may not be representative of other months of the year.

CLASSIFICATIONS USED

- 13** Country of birth data are classified according to the *Standard Australian Classification of Countries (SACC), 2011* (cat. no. 1269.0).

- 14** Occupation data are classified according to the *ANZSCO – Australian and New Zealand Standard Classification of Occupations, First Edition, 2006 Revision 1* (cat. no. 1220.0).

- 15** Industry data are classified according to the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006 Revision 1.0* (cat. no. 1292.0).

NOTES ON ESTIMATES

- 16** People who were away from work during the reference week were included in the 'Less than 1 hour/no hours' category for the data item 'Hours actually worked in main job'.

- 17** Employees have been classified as 'With paid leave entitlements' if they were entitled to paid sick leave and/or paid holiday leave. In all other cases, employees have been classified 'Without paid leave entitlements'.

- 18** For the data item 'Days of the week usually worked in all jobs', people who reported that they worked all days from Monday to Friday, inclusive, were categorised as working Monday to Friday. These people may have reported that they also worked on Saturday and/or Sunday in their job/s. These people are counted in both 'Monday to Friday' and 'Saturday' and/or 'Sunday' depending on which days they worked. In addition, for those who did not work on all of the days Monday to Friday, these people would be counted in each day (e.g. Monday, Tuesday, Wednesday, Thursday, Friday, Saturday or Sunday) that they usually work. People who reported that the days of the week usually worked varied were categorised only to 'Days varied'. A response of 'Days varied' could not be provided with any other response.

- 19** The responses given by multiple jobholders for the data items 'Days of the week usually worked in all jobs', 'Number of days of the week usually worked in all jobs', and 'Whether worked weekdays and/or weekends in all jobs' does not imply that this was their usual pattern of work in each of their jobs, rather this was their total usual pattern of work in all of their jobs.

COMPARABILITY OF TIME SERIES

- 20** The Labour Force Survey estimates, and estimates from the supplementary surveys, are calculated in such a way as to sum to independent estimates of the civilian population aged 15 years and over (population benchmarks). These population benchmarks are based on Estimated Resident Population (ERP) data. Generally, revisions are made to population benchmarks for the LFS following the final rebasing of population estimates to the latest five yearly Census of Population and Housing, or when the need arises.

- 21** From February 2009 Labour Force Survey estimates have been compiled during population benchmarks based on the 2006 Census of Population and Housing. Revisions were applied to the LFS population benchmarks in July 2010 and December 2012 to take into account the latest available population estimates. The latest revision undertaken in December 2012 is not reflected in the estimates presented in this issue.

EXPLANATORY NOTES *continued*

COMPARABILITY OF TIME SERIES *continued*

22 Changes to the LFS population benchmarks impact primarily on the magnitude of the Labour Force Survey estimates (i.e. employment and unemployment) that are directly related to the underlying size of the population. For more details on population benchmarks, see the Explanatory Notes in *Labour Force, Australia* (cat. no. 6202.0) and for details about the revisions made, see the article in the November 2012 issue of *Labour Force, Australia* (cat. no. 6202.0) and the article in the September 2010 issue of *Labour Force, Australia* (cat. no. 6202.0).

23 Care should be taken when comparing results from the 2012 Forms of Employment Survey to surveys prior to 2008. See *Forms of Employment, Australia, November 2011* (cat. no. 6359.0) for details of changes to previous FOES.

24 From 2009, the survey included people in very remote areas of Australia except for people living in Aboriginal and Torres Strait Islander communities in very remote parts of Australia.

COMPARABILITY WITH MONTHLY LFS STATISTICS

25 Due to differences in the scope of this supplementary survey and that of the monthly LFS, the estimation procedure may lead to some small variations between labour force estimates from this survey and those from the LFS.

PREVIOUS SURVEYS

26 The Forms of Employment Survey was first conducted in August 1998 then in November 2001, November 2004 and annually since November 2006 under the catalogue number 6359.0. Other surveys on employment arrangements have been published in:

- *Employment Arrangements, Retirement and Superannuation, Australia* (cat. no. 6361.0);
- *Working Time Arrangements, Australia* (cat. no. 6342.0); and
- *Pregnancy and Employment Transitions, Australia* (cat. no. 4913.0).

ACKNOWLEDGEMENT

27 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act, 1905*.

RELATED PUBLICATIONS

APPENDIX 1 FORM OF EMPLOYMENT

FORM OF EMPLOYMENT

The following provides an outline of how people are classified in the 'Form of employment in main job' data item.

Persons are classified as employees (excluding owner managers of incorporated enterprises (OMIEs)), owner managers of incorporated enterprises and owner managers of unincorporated enterprises (OMUEs) based on their responses to questions in the monthly Labour Force survey (LFS).

Employees (excluding OMIEs) from the LFS are persons who:

- work for a public or private employer; and
- receive remuneration in wages or salary; or are paid a retainer fee by their employer and worked on a commission basis, for tips, piece-rates or payment in kind.

Owner managers of incorporated enterprises from the LFS are persons who:

- work in their own incorporated enterprise, that is, a business entity which is registered as a separate legal entity to its members or owners (also known as a limited liability company).

Owner managers of unincorporated enterprises from the LFS are persons who:

- operate their own unincorporated enterprise, that is, a business entity in which the owner and the business are legally inseparable, so that the owner is liable for any business debts that are incurred. This category includes those engaged independently in a trade or profession.

These people from the LFS are then asked questions in the FOES to identify key characteristics of employees, independent contractors and other business operators. The responses to these questions are then used to determine how people are classified as employees, independent contractors and other business operators in the 'Form of employment' data item.

These questions are:

"Do you work as an independent contractor in your job?"

"Do you receive a pay slip/advice?"

"Do you/Does your business invoice or bill clients/employers?"

"Excluding wages and salary, are you able to make drawings from your employer/business?"

APPENDIX 1 FORM OF EMPLOYMENT *continued*

FORM OF EMPLOYMENT
continued

The following decision table, shows how people are classified in the 'Form of employment' data item.

Decision table: Form of employment					
	Whether considered to be independent contractor?	Whether received pay slip/advice?	Whether invoices/bills clients/ employers?	Whether able to make drawings from employer/ business	Result
Employees (excluding OMIEs)	Yes	Yes	Yes		Independent Contractor
			No	Yes	Independent Contractor
				No	Employee
		No	Yes		Independent Contractor
			No		Independent Contractor
	No	Yes			Employee
		No	Yes		Independent Contractor
			No		Employee
Owner managers (OMIEs and OMUEs)	Yes	Yes	Yes		Independent Contractor
			No	Yes	Independent Contractor
				No	Employee
		No	Yes		Independent Contractor
			No		Independent Contractor
	No	Yes	Yes		Other Business Operator
			No	Yes	Other Business Operator
				No	Employee
		No	Yes		Other Business Operator
			No		Other Business Operator

Sufficient information was obtained from respondents after answering the second or third questions to determine their 'Form of employment', therefore people were not asked these questions to reduce respondent burden.

APPENDIX 1 FORM OF EMPLOYMENT *continued*

COMPARISON WITH EMPLOYMENT TYPE

The data item 'Employment type in main job' that classifies persons according to the following broad categories:

- Employees (excluding OMIEs);
- Owner managers of incorporated enterprises; or
- Owner managers of unincorporated enterprises.

is commonly used in other Labour Supplementary Surveys.

The following table shows a comparison of the data items 'Employment type in main job' and 'Form of employment in main job'.

EMPLOYED PERSONS, Form of employment in main job—By employment type in main job—By sex

Form of employment in main job	EMPLOYEES (EXCLUDING OMIES)			Owner managers of incorporated enterprises	Owner managers of unincorporated enterprises	Total
	With paid leave entitlements	Without paid leave entitlements	Total			
	'000	'000	'000	'000	'000	'000
MALES						
Employees	3 901.7	954.5	4 856.3	13.4	16.6	4 886.3
With paid leave entitlements	3 901.7	—	3 901.7	7.7	*3.6	3 913.1
Without paid leave entitlements	—	954.5	954.5	*5.7	12.9	973.2
Independent contractors	13.9	71.2	85.1	236.7	394.7	716.5
Other business operators	—	—	—	315.0	314.1	629.1
Total	3 915.6	1 025.7	4 941.3	565.1	725.4	6 231.8
FEMALES						
Employees	3 351.7	1 193.3	4 545.0	9.3	11.9	4 566.2
With paid leave entitlements	3 351.7	—	3 351.7	*5.3	*3.5	3 360.5
Without paid leave entitlements	—	1 193.3	1 193.3	*4.0	8.4	1 205.7
Independent contractors	8.0	33.1	41.0	54.5	167.9	263.4
Other business operators	—	—	—	182.2	225.6	407.8
Total	3 359.6	1 226.4	4 586.0	246.1	405.3	5 237.4
PERSONS						
Employees	7 253.4	2 147.8	9 401.2	22.7	28.5	9 452.5
With paid leave entitlements	7 253.4	—	7 253.4	13.0	7.1	7 273.6
Without paid leave entitlements	—	2 147.8	2 147.8	9.7	21.3	2 178.9
Independent contractors	21.9	104.2	126.1	291.3	562.5	979.9
Other business operators	—	—	—	497.2	539.7	1 036.9
Total	7 275.3	2 252.1	9 527.3	811.2	1 130.8	11 469.3

* estimate has a relative standard error of 25% to 50% and should be used with caution — nil or rounded to zero (including null cells)

The table shows, there were 126,100 employees (excluding OMIEs) from 'Employment type' who were further defined as independent contractors in 'Form of employment' (comprising 85,100 males and 41,000 females). Similarly there were 51,200 owner managers (22,700 OMIEs and 28,500 OMUEs) from 'Employment type' who were further defined as employees in 'Form of employment'.

.....

APPENDIX 1 FORM OF EMPLOYMENT *continued*

COMPARISON WITH
EMPLOYMENT TYPE *continued*

Of OMIEs (in 'Employment type'), 61% were further defined as other business operators in 'Form of employment' and 36% of OMIEs were further defined as independent contractors. By comparison, half (50%) of OMUEs (in 'Employment type') were further defined as independent contractors in 'Form of employment', and 48% were further defined as other business operators.

APPENDIX 2 POPULATIONS AND DATA ITEMS LIST

DATA AVAILABLE ON REQUEST

The ABS has a range of data available on request from the Forms of Employment Survey. This section lists the data items and populations which relate to the survey. More detailed breakdowns of some data items may also be available on request.

The population(s) for a particular data item refers to the persons in the survey to whom the data item relates. Where alternative output categories are available for the same data item, these are shown and the data item name is followed by a bracketed numeral (e.g. Country of birth (2)).

For more information about ABS data available on request, contact Client Services Section in Canberra on 1300 135 070 or via email <client.services@abs.gov.au> or contact Labour Supplementary Survey Section on (02) 6252 7206 or via email <labour.statistics@abs.gov.au>.

- (a) This product replaces the publication Labour Force Status and Other Characteristics of Migrants, Australia (cat. no. 6250.0).
- (b) Data available on request for July 2001 or see Employment Arrangements, Retirement and Superannuation, Australia, Apr to Jul 2007 (Re-issue) (cat. no. 6361.0).
- (c) This product replaces the publication Working Arrangements, Australia (cat. no. 6342.0).

INTRODUCTION

1 Estimates in this publication are based on information obtained from occupants of a sample of dwellings; they are subject to sampling variability. That is, they may differ from those estimates that would have been produced if all dwellings had been included in the survey. One measure of the likely difference is given by the standard error (SE), which indicates the extent to which an estimate might have varied by chance because only a sample of dwellings was included. There are about two chances in three (67%) that a sample estimate will differ by less than one SE from the number that would have been obtained if all dwellings had been included, and about 19 chances in 20 (95%) that the difference will be less than two SEs. Another measure of the likely difference is the relative standard error (RSE), which is obtained by expressing the SE as a percentage of the estimate.

2 Due to space limitations, it is impractical to print the SE of each estimate in the publication. Instead, a table of SEs is provided to enable readers to determine the SE for an estimate from the size of that estimate (see table T1). The SE table is derived from a mathematical model, referred to as the 'SE model', which is created using data from a number of past Labour Force Surveys. It should be noted that the SE model only gives an approximate value for the SE for any particular estimate, since there is some minor variation between SEs for different estimates of the same size.

CALCULATION OF STANDARD ERRORS

3 An example of the calculation and the use of SEs in relation to estimates of people is as follows. Table 2 shows that the estimated number of persons in Australia who were other business operators was 1,036,900. Since this estimate is between 1,000,000 and 2,000,000, table T1 shows the SE for Australia will be between 11,750 and 17,050 and can be approximated by interpolation using the following general formula:

$$\begin{aligned}
 &SE \text{ of estimate} \\
 &= \text{lower SE} + \left(\left(\frac{\text{size of estimate} - \text{lower estimate}}{\text{upper estimate} - \text{lower estimate}} \right) \times (\text{upper SE} - \text{lower SE}) \right) \\
 &= 11,750 + \left(\left(\frac{1,036,900 - 1,000,000}{2,000,000 - 1,000,000} \right) \times (17,050 - 11,750) \right) \\
 &= 11,900 \text{ (rounded to the nearest 100)}
 \end{aligned}$$

4 There are about two chances in three that the value that would have been produced if all dwellings had been included in the survey will fall in the range 1,025,000 to 1,048,800, and about 19 chances in 20 that the value will fall within the range 1,013,100 to 1,060,700. This example is illustrated in the diagram below:

CALCULATION OF STANDARD ERRORS *continued*

5 In general, the size of the SE increases as the size of the estimate increases. Conversely, the RSE decreases as the size of the estimate increases. Very small estimates are thus subject to such high RSEs that their value for most practical purposes is unreliable. In the tables in this publication, only estimates with RSEs of 25% or less are considered reliable for most purposes. Estimates with RSEs greater than 25% but less than or equal to 50% are preceded by an asterisk (e.g. *3.4) to indicate that they are subject to high SEs and should be used with caution. Estimates with RSEs of greater than 50%, preceded by a double asterisk (e.g. **0.3), are considered too unreliable for general use and should only be used to aggregate with other estimates to provide derived estimates with RSEs of 25% or less.

PROPORTIONS AND PERCENTAGES

6 Proportions and percentages formed from the ratio of two estimates are also subject to sampling errors. The size of the error depends on the accuracy of both the numerator and the denominator. A formula to approximate the RSE of a proportion is given below. This formula is only valid when x is a subset of y:

$$RSE\left(\frac{x}{y}\right) = \sqrt{[RSE(x)]^2 - [RSE(y)]^2}$$

7 Considering the example above, of the 1,036,900 persons who were other business operators, 407,800 or 39.3% were female. The SE of 407,800, may be calculated by interpolation as 7,500. To convert this to an RSE we express the SE as a percentage of the estimate, or $7,500/407,800 = 1.8\%$. The SE for 1,036,900 was calculated previously as 11,900, which converted to an RSE is $11,900/1,036,900 = 1.1\%$. Applying the above formulae, the RSE of the proportion is:

$$RSE = \sqrt{(1.8)^2 - (1.1)^2} = 1.4\%$$

8 The SE for the proportion of females who were other business operators, is 0.6 percentage points, calculated as $(39.3/100) \times 1.4$. There are about two chances in three that the proportion of female business operators is between 38.7% and 39.9% and 19 chances in 20 that the proportion is within the range 38.1% to 40.4%.

9 All other estimates produced from population estimates smaller than the values in T2 have RSEs larger than 25% and should be used with caution. T2 also indicates the size of the population estimates that would produce all other estimates with RSEs greater than 50% are considered too unreliable for general use.

DIFFERENCES

10 Published estimates may also be used to calculate the difference between two survey estimates (of numbers or percentages). Such an estimate is subject to sampling error. The sampling error of the difference between two estimates depends on their SEs and the relationship (correlation) between them. An appropriate SE of the difference between two estimates (x-y) may be calculated by the following formulae:

$$SE(x-y) = \sqrt{[SE(x)]^2 + [SE(y)]^2}$$

11 While this formulae will only be exact for differences between separate and uncorrelated characteristics or subpopulations, it is expected to provide a good approximation for all differences likely to be of interest in this publication.

GLOSSARY

Born in Australia	Includes persons born in Australia, Norfolk Island and Australian External Territories.
Considered job to be casual	Employees who considered their job to be casual, regardless of any entitlements that they may receive.
Continuous duration with current employer/business	The length of the current period of employment people had with their employer or in their own business. The length of time includes periods of paid leave, unpaid leave or strike.
Drawings	Drawings are where the owner of a business withdraws money from the business for their personal use, or where an employee withdraws money from their employer for their personal use.
Employed	<p>People aged 15 years and over who, during the reference week:</p> <ul style="list-style-type: none"> ■ worked for one hour or more for pay, profit, commission or payment in kind, in a job or business or on a farm (comprising employees, employers and own account workers); or ■ worked for one hour or more without pay in a family business or on a farm (i.e. contributing family workers); or ■ were employees who had a job but were not at work and were: <ul style="list-style-type: none"> ■ away from work for less than four weeks up to the end of the reference week; ■ away from work for more than four weeks up to the end of the reference week and received pay for some or all of the four week period to the end of the reference week; ■ away from work as a standard work or shift arrangement; ■ on strike or locked out; ■ on workers' compensation and expected to return to their job; or ■ were employers or own account workers who had a job, business or farm, but were not at work. <p>Contributing family workers in their main job were excluded from the Forms of Employment Survey.</p>
Employees	<p>From November 2008, the Forms of Employment Survey definition of employees differs from the definition used in the Labour Force Survey, other household surveys (including earlier FOES), and employer surveys.</p> <ul style="list-style-type: none"> ■ <i>Forms of Employment Survey (from November 2008)</i>: Employees are people who work for a public or private employer and receive remuneration in wages or salary. Employees are engaged under a contract of service (an employment contract) and take directions from their employer/supervisor/manager/foreman on how the work is performed. ■ <i>Labour Force Survey and other household surveys (including FOES prior to 2008)</i>: Employees are persons who: <ul style="list-style-type: none"> ■ worked for a public or private employer; and ■ received remuneration in wages or salary; or are paid a retainer fee by their employer and worked on a commission basis, for tips, piece-rates or payment in kind; or ■ operated their own incorporated enterprise with or without hiring employees. ■ <i>Employer surveys</i>: Employees are wage and salary earners who received pay for any part of the reference period.
Fixed-term contract	A contract of employment which specifies that the employment will be terminated on a particular date/event.

GLOSSARY *continued*

Form of employment	<p>Classifies employed persons according to the following categories on the basis of their main job (that is, the job in which the most hours were usually worked):</p> <ul style="list-style-type: none"> ■ Employees; <ul style="list-style-type: none"> ■ With paid leave entitlements; ■ Without paid leave entitlements; ■ Independent contractors; or ■ Other business operators. <p>See Appendix 1 for more information.</p>
Full-time workers in main job	Employed persons who usually worked 35 hours or more a week (in their main job) and others who, although usually worked fewer than 35 hours a week, worked 35 hours or more during the reference week.
Holiday leave	Provision by an employer of paid holiday, vacation or recreation leave.
Hours usually worked	The number of hours usually worked in a week.
Hours worked	The number of hours actually worked during the reference week.
Independent contractors	<p>Independent contractors are persons who operate their own business and who are contracted to perform services for others without having the legal status of an employee, i.e. persons who are engaged by a client, rather than an employer to undertake the work. Independent contractors are engaged under a contract for services (a commercial contract), whereas employees are engaged under a contract of service (an employment contract).</p> <p>Independent contractors' employment may take a variety of forms, for example, they may have a direct relationship with a client or work through an intermediary. Independent contractors may have employees, however they spend most of their time directly engaged with clients or on client tasks, rather than managing their staff. See Appendix 1 for more information.</p>
Industry	<p>An industry is a group of businesses or organisations that undertake similar economic activities to produce goods and services. In this publication, industry of main job refers to ANZSIC Division as classified according to the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 2006</i> (cat. no. 1292.0).</p>
Long service leave	Provision by an employer or industry body of paid long service leave.
Main English-speaking countries	<p>The list of main English-speaking countries provided here is not an attempt to classify countries on the basis of whether or not English is the predominant or official language of each country. It is a list of the main countries from which Australia receives, or has received, significant numbers of overseas settlers who are likely to speak English. These countries comprise the United Kingdom, the Republic of Ireland, New Zealand, Canada, South Africa and the United States of America.</p>
Main job	The job in which the most hours were usually worked.
Maternity/paternity leave	The provision by an employer of paid maternity/paternity leave.
Multiple job holders	<p>Employed people who, during the reference week worked in more than one job. Only information about second job was collected. Multiple jobholders exclude those who changed employer in the reference week. People who were contributing family workers or unpaid voluntary workers in their second job were excluded from the Multiple jobholder population.</p>
Occupation	<p>An occupation is a collection of jobs that are sufficiently similar in their title, tasks, skill level and skill specialisation, which are grouped together for the purposes of classification. In this publication, occupation refers to Major Group as defined by the <i>ANZSCO – Australian and New Zealand Standard Classification of Occupations, First Edition, Revision 1, 2009</i> (cat. no. 1220.0).</p>

GLOSSARY *continued*

Other business operators	People who operate their own business, with or without employees, but who are not operating as independent contractors. Other business operators are distinguished from independent contractors in that they tend to generate their income from managing their staff or from selling goods or services to the public, rather than providing a labour service directly to a client. Other business operators spend little time working on client tasks with most of their time spent on managing their employees and/or business. See Appendix 1 for more information.
Part-time workers in main job	Employed persons who usually worked fewer than 35 hours a week (in their main job) and who did so during the reference week.
Reference week	The week preceding the week in which the interview was conducted.
Sick leave	Provision by an employer of paid sick leave.
With paid leave entitlements	Employees who were entitled to either paid holiday leave or paid sick leave (or both) in their main job. For more information see paragraph 17 of the Explanatory Notes.
Without paid leave entitlements	Employees who were not entitled to either paid holiday leave or paid sick leave, or did not know whether they were entitled to paid holiday leave or paid sick leave in their main job. For more information, see paragraph 17 of the Explanatory Notes.
Worked on a fixed-term contract	Employees with a contract of employment which specifies that the employment will be terminated on a particular date/event.
